WHAT WE DO

procharter.com

Procharter is a fully integrated aviation support services company offering market leading solutions to an international client base. With core competencies in air charter, leasing and remote site logistics support we pride ourselves in providing our customers with rapid, effective and cost efficient aviation solutions.

Our portfolio of services covers a diverse but specialised product range, from a 'one off' charter request to the complete management of complex airlift operations.

Our transparent approach to business, focus on customer service and operational excellence is testament to our professionalism and our company ethos of 'customer first excellence always' is at the heart of all we do.

Tailor-made Aviation Solutions

The Procharter team has a long standing history of military and commercial logistics operations and employs a dedicated team of subject matter experts across a wide range of disciplines.

Boots On The Ground

Procharter has teams deployed throughout Afghanistan in support of an aviation operations contract for the US Defence Logistics Agency. Managing an airlift program of over 200 aircraft movements per month, in an austere and hostile location, we are experts in shipping time sensitive, class 1 perishable and critical life support cargo to military controlled forward operating bases. We have the ability to draw on dedicated and trusted staff that can deliver on a wide range of aviation and security services. Our skills range from ramp management, ground handling and flight scheduling to the complete management of an aviation contract on your behalf.

Managing Aviation Assets

We manage a number of aircraft leasing projects (ACMI) and our in-house leasing experts can offer advice on dry, damp and full wet lease programs. This is often the most cost efficient solution for long term supply chain contracts. Our team are also market leaders in aircraft chartering, covering both 'ad hoc' or 'series' flying. We specialise in a vast array of aircraft which include B747-400F, AN-12, IL-76 and AN-124 operations.

PROCHARTER AVIATION SYSTEM [PAS]

The Right Tool For The Job

Our bespoke computerised flight planning system ensures that the customer has real time vision and control over all aviation and cargo activities managed by Procharter.

This hybrid desktop-web platform based on FileMaker (an Apple owned subsidiary) technology captures each aircraft mission, detailing aircraft type, call-sign, flight times, destinations, cargo type, weights, fuel uplift and much more. In addition to maintaining a complete date order record of all flights booked and flown, the system has a per-flight document archive function. This allows our operations team to upload the charter contracts, fuel invoices and billing data that are vital to maintaining accurate financial records necessary for mission critical audits.*

This is and will remain, a cornerstone of our business. We understand your needs.

* Procharter has its own in-house team of IRCA registered 9001: 2008 certified auditors

LEASING & CHARTERING

procharter.com

LEASING & CHARTERING

Procharter is an expert in short and long term aircraft leasing and has developed a portfolio of aircraft leasing services for both lessors and lessees. We have an in house database of worldwide carriers that ensures we offer the optimum solution for every request.

Procharter works with the markets' leading ACMI aircraft suppliers and flies thousands of hours annually on behalf of our mutual clients. Consequently, Procharter has detailed knowledge of all aspects of aircraft leasing, coupled with considerable buying power.

A clear understanding of the customers supply chain needs and an in-depth analysis of assigned operating regions ensures that Procharter consistently offers the most efficient and cost-effective aviation solution.

For all your passenger and cargo aircraft charter requirements, the Procharter team will be able to find the most efficient and cost effective solutions.

CONSULTANCY

procharter.com

CONSULTANCY

In these challenging times, our 'customer first' philosophy leads our approach and advice to our customers. With industry specific experience, we guarantee to deliver significant cost and revenue benefits, over and above your current achievements.

With specialist in house aviation consultants, we fully understand 'our market' and can therefore, quickly identify short term improvements, in tandem with adding structure and good practice to ensure tangible long term benefits.

Our senior management and consultants have all held main board positions with various airlines and aviation companies. When we say we have been there, we really do mean it. Having restructured and merged airlines, identified and introduced new aircraft types, re-planned route networks and profiled aviation capacity, we have a solid in-depth knowledge of commercial aviation.

Our integrity and transparent approach helps us to build relationships and provide business solutions that are driven through peak performance and efficiencies identified within primary activities.

These attributes allow us to demonstrate exciting new solutions and opportunities for our clients.

CARGO SOLUTIONS

procharter.com

CARGO SOLUTIONS

With A Passion For Cargo And Service

Procharter strives to provide the most innovative and cost effective solutions to our global client base. Whatever you need to move, we will deliver, worldwide, on time and on budget.

Project Cargo

Project cargo is a highly specialised field that covers shipments with unusual characteristics. These items can be of a unique size, shape or weight. Often out of gauge, they are not compatible with standard aircraft unit load devices or scheduled airline services. Our specialist team can identify, plan and offer efficient solutions to all your cargo needs.

Cargo Logistics Management

A thorough knowledge of geographic viability and destination infrastructure limitations, as well as critical experience in inter-modal transportation and documentation, will ensure your cargo is shipped internationally without delay.

Procharter Offers "Aircraft on Ground" Solutions

When your aircraft is disabled, we stand ready to help you return it to revenue service. With dedicated Procharter teams operating across Europe, the Middle and Far East, we are able to offer you the most efficient and timely solution. Our team of specialists can identify, plan and offer efficient solutions for all your cargo needs.

AN-124 OPERATIONS

procharter.com

AN-124 OPERATIONS

Our partners provide us the opportunity to offer bespoke airlift solutions to many industry sectors. It also provides Procharter with a unique exposure to 'one way' AN-124 availability.

Our access to, and vision of, reduced cost charter flights should make us your first call for Oil & Gas, AOG, Humanitarian - Government - Military and Construction materials.

The Antonov' AN-124's versatile cargo capacity for heavy or out of gauge cargo, is often the solution that keeps your business running on track.

NGO, GOVERNMENT AND MILITARY

Air Transport Is A Vital Link In The Global Supply Chain

Procharter's dedicated team can enable the rapid delivery of mission critical supplies to military forces, government contractors and energy sector clients. Our team of professionals has a proven track record, successfully providing airlift services to NATO, United Nations, US and UK military forces. Specialising in both rotary and fixed wing aircraft operations, Procharter has extensive experience in the hub and spoke concept and the demands of working at remote site forward operating bases.

Dovetailing With Military Staff

Our operations team has a military background and understands the need to follow a chain of command and standard military operating procedures. Knowledge of military aircraft including C17 globe master and specialist ground equipment, offer customers the opportunity to outsource their manpower requirements with minimal management oversight.

Security Clearance (Badging)

Often a 'show stopper' and a complicated lengthy process that can delay mobilization, our staff have held a variety of security clearances vital to supporting defence contracts. These include clearance levels ranging from basic Security Clearance (SC), to the more sensitive Developed Vetting (DV) Top Secret recognised by UK intelligence agencies and HM Government.
